Viking craft, Norway: Assembly Instructions

The scourge of Europe from roughly the ninth through the 11th centuries, the Vikings and their fast, seaworthy vessels are said to have reached as far as North America around 500 years before Columbus. These craft were characterized by a single central mast about 20 meters high and a single sail. A partially preserved vessel has been discovered on the shores of Norway’s Oslo Fjord.

*This model was designed for Papercraft and may differ from the original in some respects.

- **Parts list(pattern):** Five A4 sheets (No.5 to No.9)
- **No. of Parts:** 85

*Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.

*Hint: Trace along the folds with a ruler and an exhausted (no ink) to get a sharper, easier fold.

---

Tools and materials

- **Scissors, set square, glue** (We recommend stick glue), pencil, used ballpoint pen, toothpicks, tweezers, (useful for handling small parts)

Assembly tip

- Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

Caution

- Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.
